Elementary Common Formative Assessment				1	2	1
Secondary Common Formative Assessment			1	2	1-2	1

- The Common Formative Assessments will be based on the specific standard or learning objective taught.
- Types of formative assessments are Rapid Response Tests from School City, creating an assessment from the Inspect item bank in School City, or a teacher created assessment. The entire grade level, course level, collaborative group must utilize the same common formative assessment.
- Support staff ideas: train on specifics of School City, including the report types and teacher tools. Tracking slip to support staff that could request specific reports, and request a time to train on how to generate reports or teacher supports.
